Full Stack Software Developer with strong interpersonal skills. I am an effective communicator, teammate, and leader with a competitive drive to learn and contribute to high-quality software with a passionate team dedicated to making an impact through their work.

Experience

BuildFire   San Diego, CA
Full Stack Software Developer Intern   02.2020 – PRESENT
- Build plugins for BuildFire's marketplace using Vanilla JavaScript on the front end and server-side
- Incorporate professional best-practices such as functional tests, QA, cross-browser and cross-platform optimization, and performance optimization
- Implement my own design, modularized code structure, and analytics tracking in sprint-style periods of development

Freelance Work   San Diego, CA
Full Stack Web Developer   01.2020 – PRESENT
- Built a full SPA using React for Pie 'N Burger restaurant in Pasadena, CA
- Designed the site to match the company's brand and the client's needs
- Learned to incorporate mobile-first development practices, cross-browser support, and site optimization tools for performance, like file compression to decrease page-load times
- Adhered to accessibility practices to assure ADA compliance

Coding Zeal   San Diego, CA
Full Stack Software Developer Intern   10.2019 – 11.2019
- Built a logistics and scheduling web app for non-profit La Jolla Playhouse's annual pop tour using React and Ruby on Rails with a PostgreSQL database
- Built reusable features using Styled Components for a clean code base and matched the build down to the pixel according to a professional design by another CZ team member
- Learned to effectively communicate blockers as well as estimated time of delivery of features to optimize the development process in coordination with the other team members
- Developed team-working skills through pair programming with other interns on the project as well as leadership skills in assuring all members of the team contributed and understood the scope of our work
